Getting Started with Your Bookkeeping Tool

For firm owners and staff: sign in, add clients, keep books, and stay secure

ESource AI Group

What makes this tool different

Your brand

Your firm's name and logo on screen, and "Prepared by" your firm on every client report.

Data stays with you

Bank statements and books live only on your firm's computers, never on our servers.

Locked to your firm

Books and backups are encrypted. Only signed-in people at your firm can open them.

Signing in

1. **Open your firm's web address** Use the address your owner gave you. Bookmark it.

2. **Type your work email** Click Email me a code. Your owner must have added you first.

3. **Enter the 6-digit code** Check your email. The code works for 10 minutes.

4. **Stay connected weekly** Connect to the internet at least once a week. After 14 days offline, it locks until you sign in again.

For owners: the License tab

- See your plan, active client books, and the highest count this month
- Add each staff member with their own work email
- Remove someone the day they leave; their computer locks the books
- Copy the monthly license report when asked
- Never share a login; each person signs in as themselves

You decide

Only people the owner adds can sign in. Removing a person stops them from opening your books, even on their own computer.

Adding a client

1. **Go to the Status tab** Type the client's full business name and pick Business or Nonprofit.
2. **Click Add client** You need internet for this, so your plan count stays right.
3. **Fill in Setup** Entity type, owners, tax preparer, sales tax, and start date.
4. **If your plan is full** You'll see a message. Ask your owner to move up a tier.

Bringing in bank statements

Wells Fargo PDFs

Drop the statement PDFs on the Upload tab. Many at once is fine.

Any other bank

Download CSV, Quicken (QFX), QuickBooks (QBO), or OFX. Quicken or QuickBooks files work best.

PayPal and Stripe

Upload the activity CSV to capture full sales, fees, and refunds.

Sorting and client questions

Rules sort

Most lines sort themselves using rules, like fuel or bank fees.

Ask Client

Lines it can't sort are grouped so you ask the client once per group.

Remember

Check Remember, and lines like that sort themselves next month.

The more you answer, the less you have to answer. Each month needs fewer questions than the last.

Your reports

Health

Green, yellow, and red checks with the dollars behind each one.

P&L and balance

Monthly profit and loss, plus what the business owns and owes.

Excel package

Every sheet says "Prepared by" your firm. Send it to the client or tax preparer.

Backups: the 3-2-1 rule

- Click Download backup at the end of every work session
- Keep 3 copies on 2 kinds of storage, with 1 away from the office
- Backups are locked to your firm, so a lost file can't be read
- New computer: sign in, then Restore from backup on the Status tab
- Never clear this site's browser data without a fresh backup

3-2-1

3 copies, 2 kinds of storage, 1 kept away from the office.

You're ready to start

Sign in · Add a client · Upload statements · Answer questions · Back up
