

The Product Launcher Suite

From new product to ready sellers — faster Every day between a new product and a ready sales team is lost revenue.

Where Launches Lose Time

-  Subject matter experts have little time to advise Sales Enablement
-  Sales managers are stretched thin by ride-alongs, meetings, and admin
-  Researching and designing new training takes weeks
-  Building slide decks is slow
-  Instructors cost money — and only speak one language Result: launches slip, and revenue slips with them

Build Training Faster

Researcher

gathers trusted source material on a new topic in minutes, not days

Course Designer

turns those sources into a course outline, slides, and instructor notes, dramatically faster

Make Every Deck Look Right

Deck Re-Styler

converts a finished deck into your company's own template

Add a PPTX Template Style

teach the system a new brand template once, then reuse it every time

Deliver to Every Seller

Course Publisher

publishes a course to a live AI teacher

- Available instantly
- Speaks and translates slides in 16 languages
- No instructor fees

Presenter

an AI presenter for your products and services

- One-to-one marketing, at any hour
- Answers questions and helps qualify prospects

See What's Working

Dashboard – shows each course, each learner, and where they are Know who is ready before launch day

Digital Teammates

Digital SMEs

your experts' knowledge, available whenever Sales Enablement needs it, so launch materials aren't delayed

Digital Sales Managers

extend each manager's coaching to every seller, one by one, so sales are maximized

Create Capacity, Then Grow

TaskMappr

interviews employees to map current jobs and the time each task takes, then plans AI to remove lower-level work

- Frees people for higher-value, revenue-producing work
- Example: IKEA turned about 8,500 freed-up roles into interior designers — adding over a billion in new sales

MasterMind Group

customer personas and digital teammates (SMEs, sales managers, finance) brainstorm new products, services, new logos, and ways to grow revenue

Start With One Launch

01

Pick one upcoming product launch

02

Build it, deliver it, and measure it with the suite

03

Prove the value, then scale what works Thank you — questions?
