

Turn trusted relationships into a new AI revenue practice.

ESource gives you the offers, sales support, and delivery capability to open higher-value client conversations—without building the products yourself.

**Your trust opens the door.
ESource brings the engine.**

AI

PARTNER OPPORTUNITY

A practical way to expand your
value and your revenue.

The opportunity is already in your client base.

Your clients are confronting AI adoption, product-launch, and execution problems. You can now help them move forward with a ready-made ESource engine.

MONETIZE TRUST

Open a new revenue conversation inside relationships you already own.

SKIP THE BUILD

Use proven offers, methods, materials, and delivery support without building an AI practice from scratch.

INCREASE CLIENT VALUE

Bring a practical path from AI interest to business results.

JOIN THE NETWORK

Collaborate with experienced partners, share lessons, and create opportunities together.

This is a growth platform, not a logo program.

Start with the relationships you already have; earn the right to expand from there.

Why two separate ESource companies matter.

The right routing decision protects the client relationship and improves deal quality.

ESOURCE AI GROUP

**Different problems.
Different contracts.
Different revenue.**

AI Group sells defined learning, enablement, and AI solutions.

ESOURCE EXECUTION PARTNERS

Route before you pitch.

Execution Partners diagnoses why AI investments are not delivering value.

Two distinct companies. Clear routing. Stronger client trust.

What ESource AI Group sells—and when to open it.

Open AI Group when the buyer wants a direct answer to a defined readiness or learning problem.

ESOURCE AI GROUP

Make a defined solution launch-ready.

- The Product Launcher
- Custom AI Solutions
- AI Classes and Learning Programs

PRIORITY BUYERS

CROs, revenue enablement, product, L&D, and PE operating partners.

- Approaching launch or major release
- Inconsistent seller readiness
- Long ramp times or trapped expertise

Defined problem? Bring AI Group into the conversation.

What ESource Execution Partners sells—and when to open it.

Open Execution Partners when leaders know AI investment is not producing the operating result they expected.

ESOURCE EXECUTION PARTNERS

Make AI adoption executable.

- Crash Test
- CrashScan, Challenger, Roadmap
- Adoption Sprints + Scale and Sustain

PRIORITY BUYERS

CEOs, COOs, CFOs, CHROs, and PE/VC operating partners.

- AI licenses are not changing results
- Workflow friction remains
- ROI, ownership, or priorities are unclear

Unclear cause? Start with Execution Partners.

Before the demo, make the routing decision.

The partner who asks the right business question earns the right to advance the opportunity.

ROUTE TO AI GROUP WHEN...

The buyer knows the problem and wants a direct solution.

- Product launch or seller readiness
- Specific user group and source material
- Sponsor and measurable baseline

ROUTE TO EXECUTION PARTNERS WHEN...

The buyer knows results are missing but needs diagnosis.

- AI investment is not changing work
- Scope, evidence, or ownership are unclear
- Client accepts diagnose-before-prescribe

Ask first. Route second. Let the evidence shape the offer.

Find the business trigger before you mention an offer.

The strongest partners do not lead with AI. They lead with what is not changing.

LAUNCH / READINESS

Product launch, seller readiness, ramp, approved knowledge.

SPONSOR / SCOPE

Named decision-maker, bounded problem, access to users and evidence.

ADOPTION / EXECUTION

AI investment not changing work, ROI unclear, workflow friction.

TEAM / CHANGE

Managers and employees are included; job-impact concerns are addressed.

Lead with the problem, not the catalog.

What is not changing—and who owns the result?

Do not confuse interest with a qualified opportunity.

A real opportunity has a problem, a sponsor, evidence, and a next decision.

1. PROBLEM + URGENCY

A specific business problem and a reason to act now.

2. SPONSOR + BUDGET

A named sponsor owns the result, decision, and credible budget.

3. USERS + EVIDENCE

Known user group, source material, access, and a measurable baseline.

4. NEXT DECISION

The client knows what decision the paid work must support.

Qualification protects your time—and the client relationship.

No demo or proposal until the business case can stand on its own.

Your credibility is protected by clear boundaries.

You create momentum. ESource owns the commitments.

YOU MAY

**Open relationships.
Conduct discovery.
Route opportunities.**

Use approved messaging and playbook questions.
Record the activity in the correct CRM stage.

ESCALATE BEFORE YOU COMMIT

Pricing, scope, security, outcomes.

Do not promise custom features,
roadmap items, security positions, price
ranges, or outcomes without approval.

When in doubt, stop and route up.

Choose how you want to participate.

Start with the role that fits your practice; expand your ownership as capability and client demand grow.

START WITH ACCESS

Refer or Co-sell

- Refer: make a qualified introduction
- Co-sell: stay active in discovery, demos, and proposals

EXPAND WITH AUTHORIZATION

Authorized Sales or Resell

- Authorized Sales: lead approved sales activity
- Resell: sell and manage authorized offers under written terms

Your role, economics, and responsibilities are defined in writing.

The engine behind your next client conversation.

You do not have to build the product, sales motion, or delivery team alone.

READY-TO-USE MATERIALS

Pitch decks, discovery questions, demos, proposals, and approved language.

DELIVERY CAPABILITY

Use ESource delivery support where you do not want to build it yourself.

JOINT SALES SUPPORT

Bring ESource into discovery, demonstrations, proposals, and escalation.

PARTNER COMMUNITY

Collaborate, network, share opportunities, and learn from shared wins.

You stay close to the client.

ESource helps power the opportunity while you stay close to the relationship.

Certification is the gate to live opportunity activity.

The goal is not a certificate. It is sound judgment in a live client conversation.

COURSE 1

Selling the AI Execution Gap

COURSE 2

Selling The Product Launcher

COURSE 3

Choosing the Correct Offer

READY FOR LIVE ACTIVITY

Route, qualify, and escalate using current approved guidance.

Complete the path. Then bring a real account.

Complete all three courses, then bring one qualified client problem to a Partner Fit Session.

Your next growth opportunity is already in your CRM.

Leave with one qualified client problem and a next meeting—not just interest.

1. LIST 10

Choose clients discussing AI adoption, launch, readiness, or execution.

3. ROUTE 1

Choose AI Group or Execution Partners based on evidence.

2. SELECT 3

Prioritize the conversations with urgency, access, and a real sponsor.

4. BOOK THE CALL

Run a joint discovery conversation and define the next decision.

Start with the client who already trusts you.

Complete certification, then schedule your Partner Fit Session.
