

AI Learning Alliance

Build Your Professional Portfolio with ChatGPT Sites

From résumé to remarkable — learn how to create a professional portfolio site, sharpen it with AI, and turn it into a reusable career asset that works for you around the clock.

What You Will Build

By the end of this course, you will have a complete, visitor-ready portfolio — and the skills to keep improving it.

Portfolio Site

A professional site that showcases your work and expertise

Personal Positioning

A sharper, stronger statement of who you are and who you help

Case Study

At least one story that proves your value with real context

AI Assistant

A reusable prompt system to update your portfolio anytime

The Big Idea

Your portfolio should not just say what you have done — it should help people understand why they should trust you with important work.

→ Who you help

Define your target audience clearly

→ How you work

Show your process and professional style

→ What problems you solve

Speak to pain points, not just job titles

→ What proof you have

Evidence beats claims every time

The First Wow

Today starts with a fast build. You will use ChatGPT Sites to transform your existing career information into a credible first version of a professional portfolio — in minutes, not days.

📄 **Don't aim for perfect. Aim for real.** A real, honest portfolio you can improve beats a blank page every time.

Gather Your Raw Materials

You likely already have everything you need. Collect as many of these as you can before you build:

Career Documents

- Résumé or CV
- LinkedIn bio
- Short professional bio

Work Evidence

- Project list and work samples
- Certifications and credentials
- Testimonials or recommendations

Personal Assets

- Headshot or approved images
- Contact information

Quick Tip

Even a rough draft résumé gives ChatGPT Sites enough to produce a solid first version. Imperfect input still produces useful output.

The First Build Prompt

Go to: <https://chatgpt.com/sites>

Click: "Create Site"

Copy, paste, and customize the prompt below with your own career details:

Build me a professional portfolio website using the information below. Make it appropriate for a busy hiring manager who may spend less than two minutes reviewing it.

Include:

- A clear introduction
- Areas of expertise
- Selected accomplishments
- Career experience
- One featured project
- A clear way to contact me

Do not invent facts.

Paste your raw materials directly after this prompt. The more context you provide, the stronger your first version will be.

Your First Review

Once your site appears, resist the urge to immediately edit. Instead, step back and ask these five critical questions:

01

What feels strong?

02

What feels generic?

03

What is missing?

04

What is too long?

05

What would a visitor understand in 30 seconds?

Portfolio vs. Résumé

The difference is not format — it is **proof**.

A Résumé Lists Experience

Managed implementation projects across multiple business units.

A hiring manager reads this and wonders: how many projects? What kind? What went wrong? Did it work?

A Portfolio Proves Value

Here is the problem we faced, what I led, what changed as a result, and what I learned along the way.

Now a hiring manager has context, evidence, and a reason to reach out. That is the difference a portfolio makes.

The Portfolio Promise

Every strong portfolio answers one question:

"Why should this person be trusted with important work?"

Your site should make that answer clear within the first 30 seconds of a visit — before a recruiter scrolls, before they click, before they decide whether to stay.

Improve the First Version

Before making any changes, get an honest outside perspective. Use this prompt to identify what is holding your portfolio back:

Act as a professional portfolio editor. Review this site from the perspective of a busy recruiter.
Identify the five things that currently make it feel generic, unclear, or difficult to scan.
Prioritize the changes by impact.
Do not revise yet — only diagnose.

 The "do not revise yet" instruction is critical. Getting a clear diagnosis before editing helps you prioritize the changes that matter most.

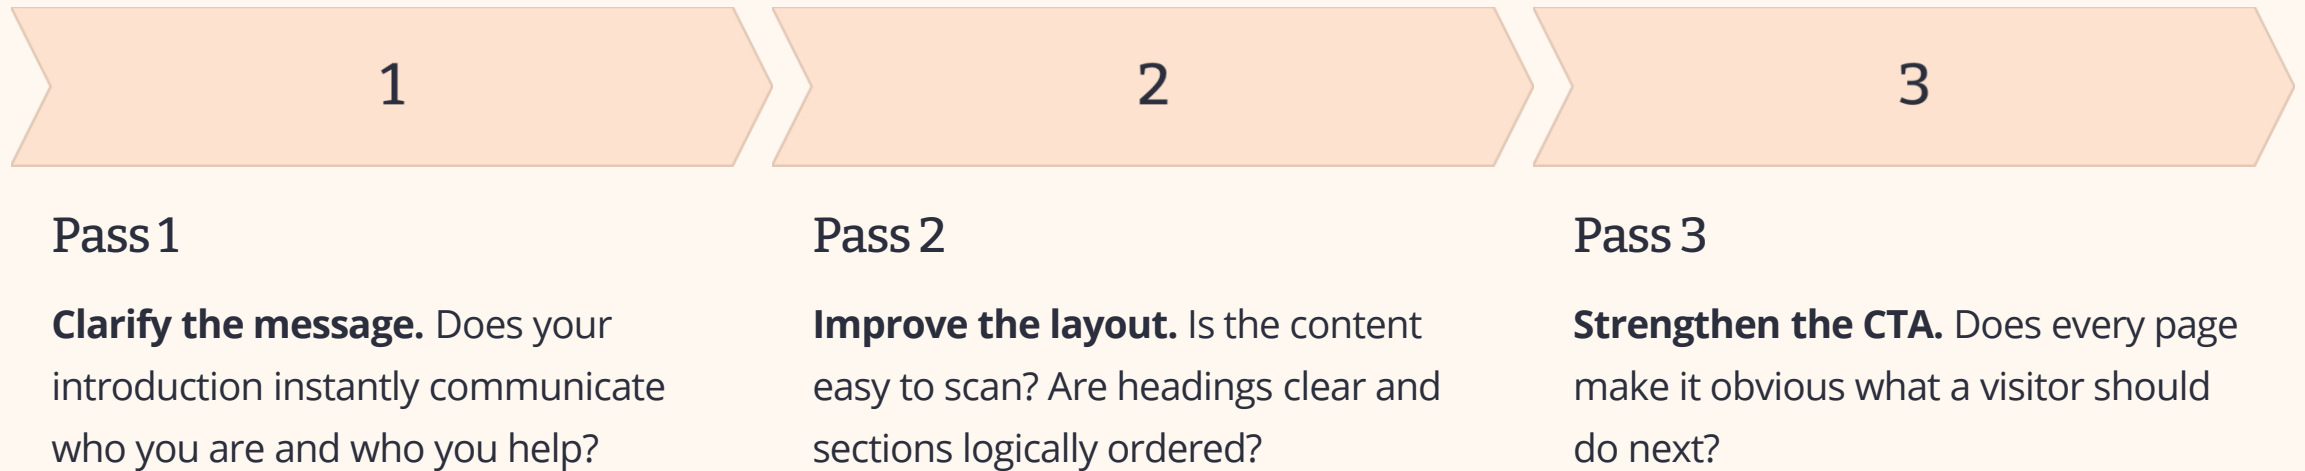

Apply the Best Fixes

Once you have your priority list, use this prompt to apply only the highest-impact improvements — keeping your voice intact:

Apply the three highest-impact improvements identified.
Keep the writing natural, specific, and professional.
Do not exaggerate my experience.
Do not invent metrics, clients, responsibilities, or results.

Mini Activity — The 3-Pass Edit

Great portfolios are not written in one shot. Work through three focused passes, each with a single goal:

What Good Looks Like

A strong first portfolio site does not need to be complex. It needs to be clear. Here is the benchmark:

Easy to Scan

Specific

Honest

Audience-Aware

Evidence-Based

Clear Next Steps

Section 1 Deliverable

CHECKPOINT

You have completed Section 1. Here is what you now have in hand:

1

Portfolio Version 1

A real, published first version of your professional site — built and reviewed in one session

2

Improvement Priorities

A ranked list of the changes that will have the highest impact on how visitors experience your site

3

AI Direction Skills

A clearer understanding of how to prompt ChatGPT Sites to produce specific, useful results

Up next: Turn your site from AI-generated into genuinely, unmistakably yours.

FULL COURSE

What's Next in the Full AILA Course?

From first draft to polished professional asset in AI Learning Alliance's full version.

You've built the first version of your professional portfolio. In the rest of the course, we'll turn it into a polished, persuasive, AI-supported professional asset and introduce you to more uses of ChatGPT Sites that enable you to build much more...
