

The AI Execution Gap

PORTFOLIO VALUE AT RISK

Michael Giambra and Christina France

ESource AI Execution Partners

**AI investment is accelerating.
The proof of portfolio value is not.**

ABOUT US

At ESource, we turn AI potential into AI performance.

For 30+ years, we have helped organizations improve how people work. AI changes the technology—but it does not remove the need for leadership alignment, adoption, workflow discipline, governance, knowledge capture, and execution capacity.

We are tool-agnostic. We start with what the portfolio company already owns and ask:

Why isn't it producing the value you expected?

Having AI isn't the win — using it is.

THE PORTFOLIO VALUE GAP

AI spending keeps rising. Measurable enterprise value is still hard to prove.

4%

of companies are creating substantial AI value.

[BCG](#)

>80%

report no tangible enterprise-level EBIT impact from GenAI.

[McKinsey](#)

25%

of AI initiatives delivered expected ROI; 16% scaled enterprise-wide.

[IBM](#)

6%

reported AI payback in under one year.

[Deloitte](#)

**For investors, this is not just a technology problem.
It is a capital-allocation, operating-performance, and exit-value question.**

PE risk: EBITDA and hold-period value can stall.

VC risk: burn rises while growth, scale, and operating leverage lag.

BEFORE YOU INVEST MORE, DIAGNOSE THE GAP

The most expensive assumption is: “We bought the technology. The value will come.”

Leadership alignment • Workforce adoption • Workflow integration
Data • Governance • Knowledge capture • Execution capacity

83% of CEOs say AI success depends more on people's adoption than on the technology itself.

Most organizations do not need more AI. They need more value from the AI they already own.

THE NON-NEGOTIABLE: TEAM BUY-IN

Without employee buy-in, the strategy has zero chance of succeeding.

AI STRATEGY

**TEAM
BUY-IN**

**BUSINESS
VALUE**

Understand the purpose • Shape the workflow • See the benefit
Trust the process • Build the skills • Have support

AI STRATEGY – TEAM BUY-IN = FAILURE

AI adoption creates value only when employees shape the solution.

PRODUCT OVERVIEW

CrashTEST™

FAST PORTFOLIO-COMPANY SIGNAL

Behaviorally anchored questionnaire covering:

- Leadership & Strategy
- Culture
- Process Design
- Data Access
- Workforce Enablement
- Ethical Governance
- Vendor Ecosystem

90-minute facilitated readout • approximately 2 weeks after questionnaire receipt

INVESTOR QUESTION

Is there an AI execution problem worth investigating further?

Buy clarity before buying transformation.

Fast signal
Evidence-based score
Clear next-step decision

PRODUCT OVERVIEW

CrashSCAN™

DEEPER ANALYSIS — ONLY WHEN WARRANTED

Customized deep dive may include:

- Executive & operating-team interviews
- Manager and frontline discussions
- SME interviews
- Workflow / process reviews
- SOP reviews
- Targeted surveys

Outcome: a prioritized picture of execution risk, value leakage, and recommended next actions.

THE DECISION

Where is value leaking — and what is causing it?

CrashTEST tells you whether to look deeper.
CrashSCAN tells you where to act.

The analysis can end here.
No automatic transformation project.

ANALYSIS FIRST. EXECUTION ONLY IF WARRANTED.

We do not assume the answer before the analysis.

CrashTEST™

Where are the warning lights?

CrashSCAN™

What is causing the gap?

STOP HERE

if the evidence does not justify
action

OPTIONAL FOLLOW-ON SUPPORT

ESource Challenger™

Pressure-test

AI Value Creation Roadmap™

Prioritize & assign

AI Adoption Sprints™

Execute & measure

Scale & Sustain™

Expand what works

The engagement can stop after the analysis. If the findings justify action, ESource can help execute.

START WITH ONE PORTFOLIO COMPANY

Before you scale AI across the portfolio, find out what is actually working.

CrashTEST™

- Fast entry point
- Score execution risk
- 90-minute readout

CrashSCAN™

- Deeper discovery
- Interviews & reviews
- Prioritized action plan

THE PORTFOLIO QUESTION

**Is AI creating
measurable value — or
quietly consuming
capital?**

One company. One diagnostic. One
evidence-based decision.

Bain: AI is becoming one of the most important value-creation opportunities across the portfolio — and inaction is now a strategic choice.
